

TG-DH/PT...

Immersion sensors with housing

Temperature sensors with PT100- or PT1000-element and wiring housing, intended for measuring water temperature.

- M16 cable gland
- Bayonet mounted cover
- R1/4" thread
- Stainless steel immersion sensor
- Compact and modern design

Sensors in the Tempero-series that have a modern unobtrusive design. The sensors are intended for measuring water temperature.

Models

TG-DH/PT100	Immersion sensor with housing, PT100-element
TG-DH/PT1000	Immersion sensor with housing, PT1000-element

Technical data

Temperature range	-20...+120°C
Sensor element	PT100/PT1000, DIN class B
Time constant	4 s
Immersion length	90 mm
Diameter "probe"	Ø 5 mm
Thread	R1/4"
Pressure class	PN16
Protection class	IP65

Dimensions (mm)
