

# TG-KH/PT...

## Duct sensors

Temperature sensors with PT100- or PT1000-element intended for duct mounting.

- M16 cable gland
- Bayonet mounted cover
- 10 mm hole for probe
- Adjustable insertion length and tight closing
- Compact and modern design

Immersion sensors in the Tempero-series with a modern design that fits into any environment. The sensors are intended for duct mounting. TG-KH/PT100 and TG-KH/PT1000 have adjustable insertion length and an elastic and flexible mounting bracket that closes tightly against ducts.

## Models

TG-KH/PT100	Duct sensor with housing, PT100-element
TG-KH/PT1000	Duct sensor with housing, PT1000-element

## Technical data

Temperature range	-20...+120°C
Sensor element	PT100/PT1000, DIN class B
Time constant	16 s
Insertion length	60...230 mm, adjustable
Probe diameter	Ø 8 mm
Protection class	IP65

## Dimensions (mm)
