

WINDOW VENTS

Air supply units • March 2005

Fresh window vents are designed for mounting in the frame or upper part of the window. The vents are available in several different models to satisfy all demands regarding function, air flow, type of window, ease of mounting and appearance.

Window vents are a cost effective solution compared to wall mounted vents. However, wall vents provide superior performance in preventing draught, damping noise and filtering the air.

3 year guarantee

Fresh 22	Mounting	Hole opening	Free area	Max airflow	Art no
		Slot 200 x 12mm	2000mm ²	10 Pa; 3,4 l/s 20 Pa; 5,2 l/s	221001
