

RSL transfer grille

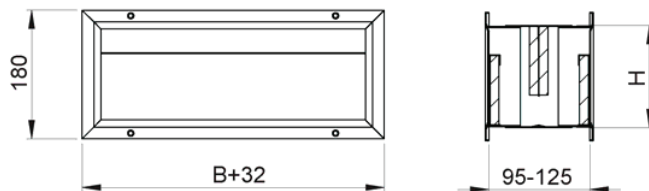

RSL is a transfer grille to be installed between rooms. The distance between the grilles is adjustable in the range of 95-145 mm.

- Adjustable frame depth adapts to the thickness of the wall.
- Minimal pressure level.
- Detachable front panel for easy cleaning of the grille.
- Effective noise attenuation between two rooms.
- No visibility through the transfer grille.

Air moves to adjoining rooms through the transfer grille due to pressure difference. The grille attenuates sounds and reduces noise transmittance through the air between two rooms. In general the grille is installed on a wall above the door.

Sizes

Size	B x H
300	300x150
400	400x150
600	600x150
800	800x150
1000	1000x150

Marking

RSL	B xH	RAL 9010
Symbol	Width x Height	Colour code

Example: RSL 500x300
