

RSM sound attenuating transfer grille

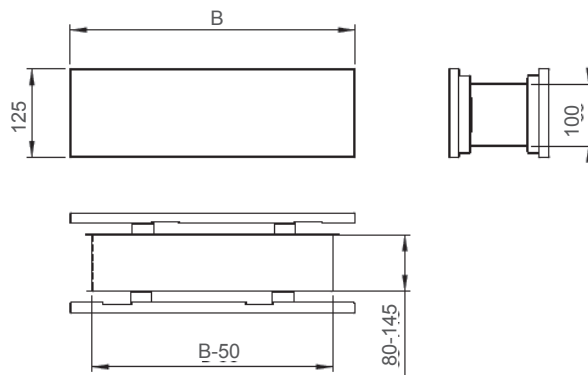

RSM is a transfer grille with effective sound attenuation to be installed between rooms. The distance between the grilles is adjustable in the range of 80-145 mm.

- Adjustable frame depth adapts to the thickness of the wall.
- Aesthetical design.
- Minimal pressure level.
- Detachable front panel for easy cleaning of the grille.
- Effective sound attenuation between two rooms.
- No visibility through the transfer grille.

Air moves to adjoining rooms through the transfer grille due to pressure difference. The grille attenuates sounds and reduces noise transmittance through the air between two rooms. Standard widths of the grilles (B) are 600, 800 and 1000 mm

Sizes

Size	B x H	Opening size
300	300x125	250x100
600	600x125	550x100
800	800x125	750x100
1000	1000x125	950x100

Marking

RSM	B	RAL 9010
Symbol	Width	Colour code

Example: RSM 600

Technical data

Rõhukadu (Pa) – Pressure drop (Pa)
 Õhuhulk (l/s) – Air volume (l/s)
